

Prestashop Custom Product Options | Add Extra Fields to Product

Boost conversions and average order value by offering customers additional products or services on your product pages. Allow your customers to customize the product the way they want using the options.

- Lets you add extra fields to your product pages.
- Supports dropdown, radio button, text, textarea, checkbox, image file, date, time, and date & time option types.
- Set different impact prices on different values of product options.
- Assign multiple options to a product in a few clicks.
- Define price impact for each option.

Note: Prestashop Custom Product Options module is compatible with PrestaShop version 8.x.x and multi-store feature.

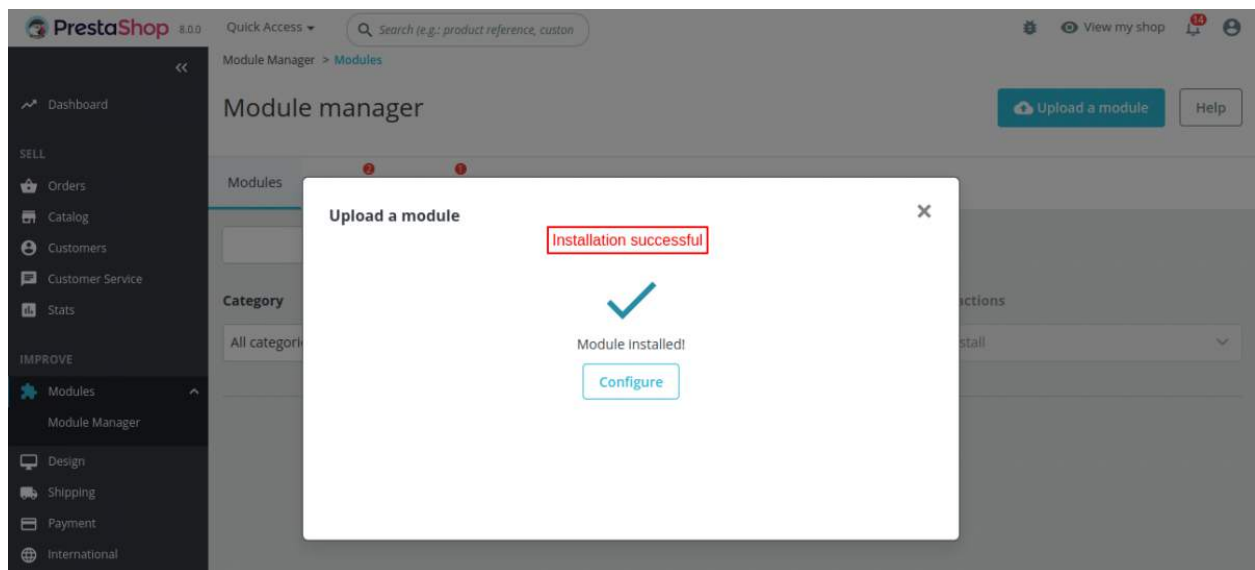

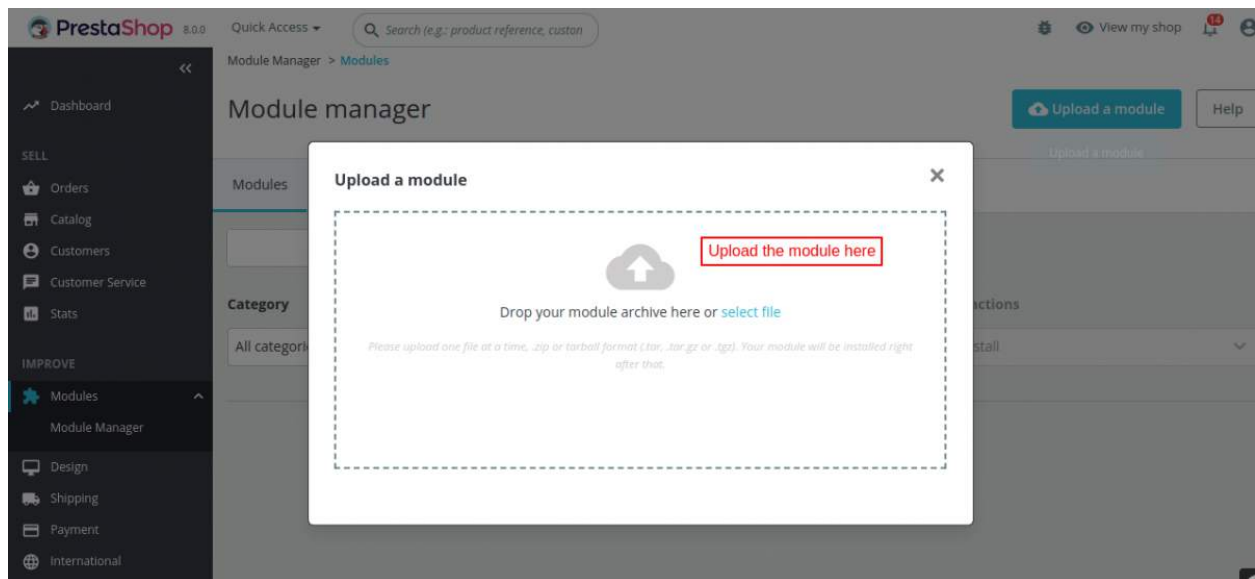

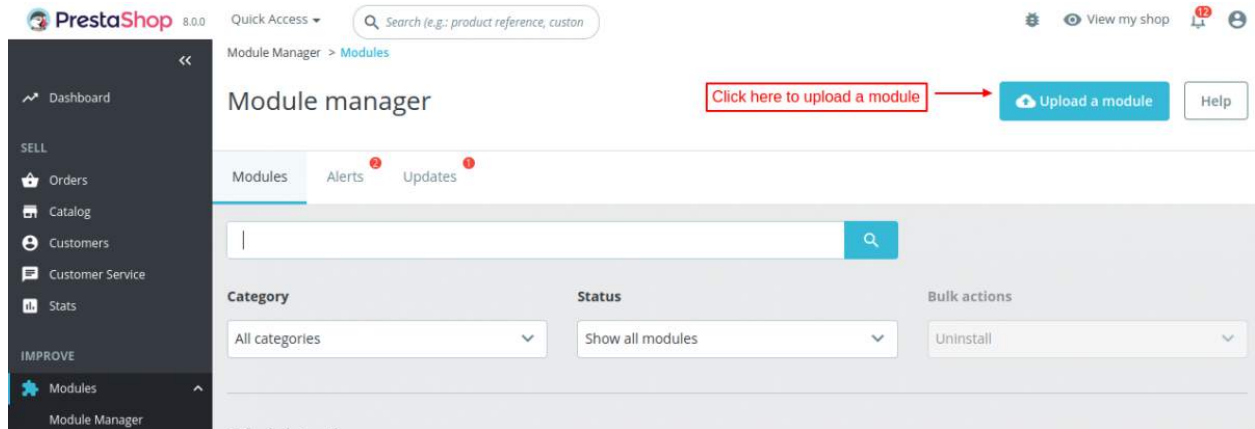

Features of Prestashop Custom Product Options

- Add options to product pages using fields like text, textarea, dropdown, checkbox, radio button, image file, date, time, and date & time .
- Select countries and currencies for which you want to show the product options.
- Select a customer to whom you want to show the fields.
- Specify the date range for which the option will display on the product page.
- Set prices for certain product options in terms of fixed price or percentage.
- Add option values while adding dropdown, checkbox and radio button options and set different price for different values.
- Show product fields for specific categories and customer groups.
- Select products to exclude the options for.
- Apply options to specific combinations of a product.
- Assign options to multiple product combinations at once.
- Enable, disable or delete the options in bulk via mass action.
- Set the options as pre-selected while adding them.
- Make the option selection mandatory.
- Set the sequence in which you want to display the product options.
- Configuration to show color picker for text and textarea custom options.
- Set character limit for text and textarea options.
- Show the options selected by customers in a popup or normal view on the cart, order confirmation, and order details page.
- Customers can view options assigned to the product on the product details page.
- Customers can select options they require to customize their products.
- A new button added to the cart page to view saved product options.
- Customers can add different option values for the same product.

- Selected product options & values can also be viewed on the order confirmation and details pages.
- You can also view product options and values selected by customers on the admin order details page.
- Show product options in order confirmation email, invoice, and delivery slip.

How to Install Prestashop Custom Product Options

- Firstly, go to the module manager in the back office and click on 'upload a module'.
- After that, drag and drop the module file or select the file from the system.
- In this way, the module installation will be successful.

Add Product Options

After the installation of the module, a new tab “Product Options” get available in the back office. From here, the admin can add and manage the product options.

The image displays two screenshots of the PrestaShop back office interface. The top screenshot shows the 'Dashboard' page. In the left sidebar, the 'Product Options' menu item is highlighted, and a red box with an arrow points to it, accompanied by the text 'A new tab is added to back office'. The main content area shows various dashboard widgets, including 'Online Visitors', 'Active Shopping Cart', and a 'Sales' chart. The bottom screenshot shows the 'Product Options' page. A red box with an arrow points to the 'Add new option' button, with the text 'Click here to add a new product option'.

Admin can add a new product option by clicking on the “Add new option” button.

Text Option

On clicking the button, a new form appears with the following options:

1. Option type – Select the type of option.
2. Take User Input – Enable this field to display a text box right below the option where the user can enter the text he wants to be displayed on the product.

3. Option name – In this field, specify the name of the option. The name lets you identify the option while assigning it to the product from the edit product page.
4. Display name - Here you need enter custom text that will display for the option on the front.
5. Placeholder - Enter text that will be visible as placeholder in the text box.
6. Character limit: Set the number of character that customers can enter in the text box.
7. Option Description – Here, you need to specify the description for the option. This will display as a hint on the product page.
8. Country and currency – These options allow you to select the country and currency for which you want to display the product option.
9. Customer – Select the customer to whom you want to display the product option.
10. Availability Date – Set the date range within which the product option will display.
11. Price Impact – The option you to set the price for the product option. You can choose to set a fixed price or percentage amount of the product price.
12. Active – Enable or disable the product option.
13. Pre-selected - If enabled, then the option will display as pre-selected on the product page.
14. Required - Enable this field to make the selection of product option mandatory for the customers.
15. Allowed Categories – Select specific product categories for which you want to display the product option.
16. Apply option on selected category products - If enabled, then the product option will apply on the products of categories selected in the Allowed Categories field.
17. Allowed Group – Select the groups whose members can view the product option.
18. Exclude Products – Select products for which you do not want to display the product option.

As enabled by admin while adding the product options, the options are pre-selected and have asterisk sign with them. Also, a color picker option is displayed just below the text option. Customers can use this option to change the color of text.

The customers can also view the options in a quick view popup.

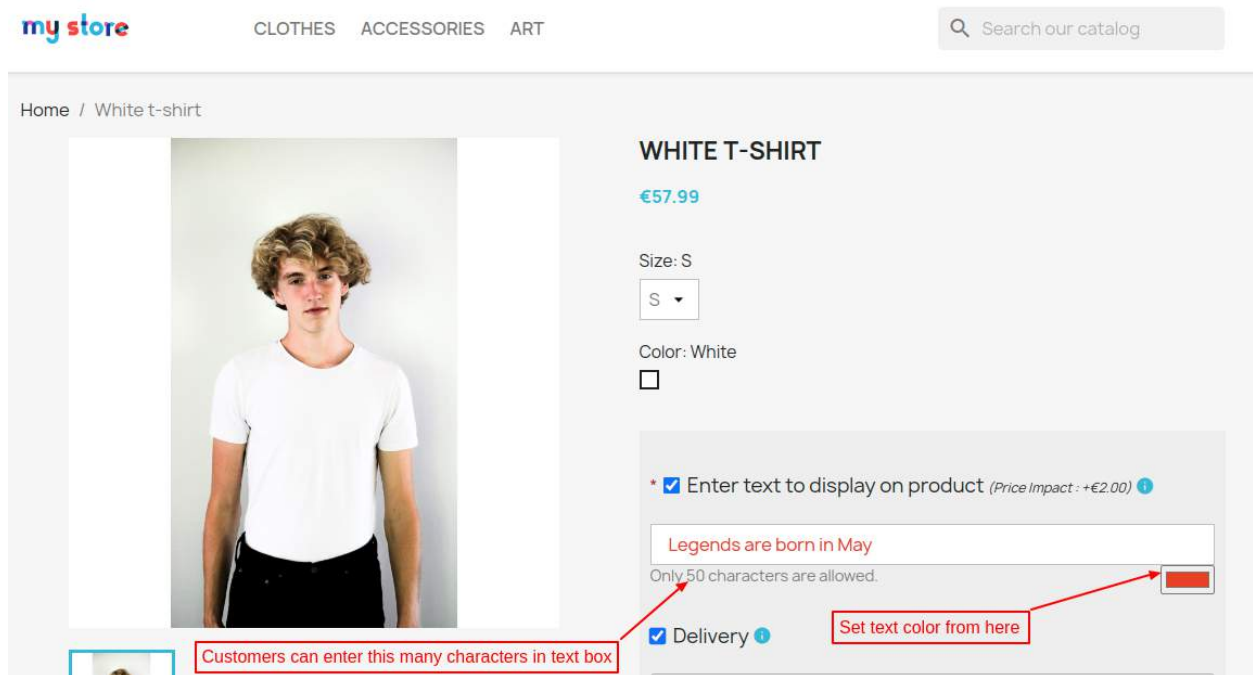

Add text to product

For adding text to the product, a customer has to select the text option type and specify the text in the text box he wants to be displayed on the product. Also, the customer can view the option description when he hovers on the hint icon.

As configured from the back office, a color picker is provided for the text option just below the textbox. Using this, the customers can select the color in which they want the text on the product.

Restrict Options for Country and Currency

Suppose, the admin has selected France and Euro in the country and currency fields while adding the text option. Now, if a customer from Australia visits the product page and selects AUD as currency, the text option will not be visible to him.
